Let's Rise and Shine Together!

Enjoy Highlights From the 52nd Anniversary Enagic Global Convention

“Independent Distributors aren’t competing for the same customers. After all, Earth houses nearly 8 billion people, so opportunities to share Kangen Water® and Ukon with new potential customers are nearly limitless.”

**Hironari Ohshiro
Enagic Founder and CEO**

Message from Mr. Ohshiro

Harness The Power of Friendship to Keep Moving Forward

It was great seeing everybody at the 52nd Anniversary Enagic Global Convention in Okinawa.

People wonder, how did Enagic get from Okinawa to Tokyo, the E.U. and London? How did you open this many markets? What do you think the most important thing is? It's about friends.

I didn't really speak to him when we were there, but Toshio Maehara and I went to school together. When I was in school, one of the people who was taking care of me would say, "If you're going to go to the U.S., visit this guy."

When we launched in the U.S. 23 years ago, Mr. Maehara picked us up at the airport in L.A. It was 40 years after we graduated from school, so he had white hair, but he remembered me. He's done a lot for us. He's the person who opened the U.S. company. He opened the bank account for us and created the order form. Once he heard about the patented 8-point compensation plan, he wrote the explanation in English. He did everything at the beginning.

He heard about all the success in the U.S. He always told me, "You should write something." I didn't want to do it because I don't like to talk about myself that much, so he wrote the book for me in 2015: *Quenching the Thirst for Global Success: From a Tiny Island to the World*.

We have the second part now. *Ohshiro & Enagic, Education: From Kindergarten to University, From a Tiny Island to the World (Part II)*. This is about recent times.

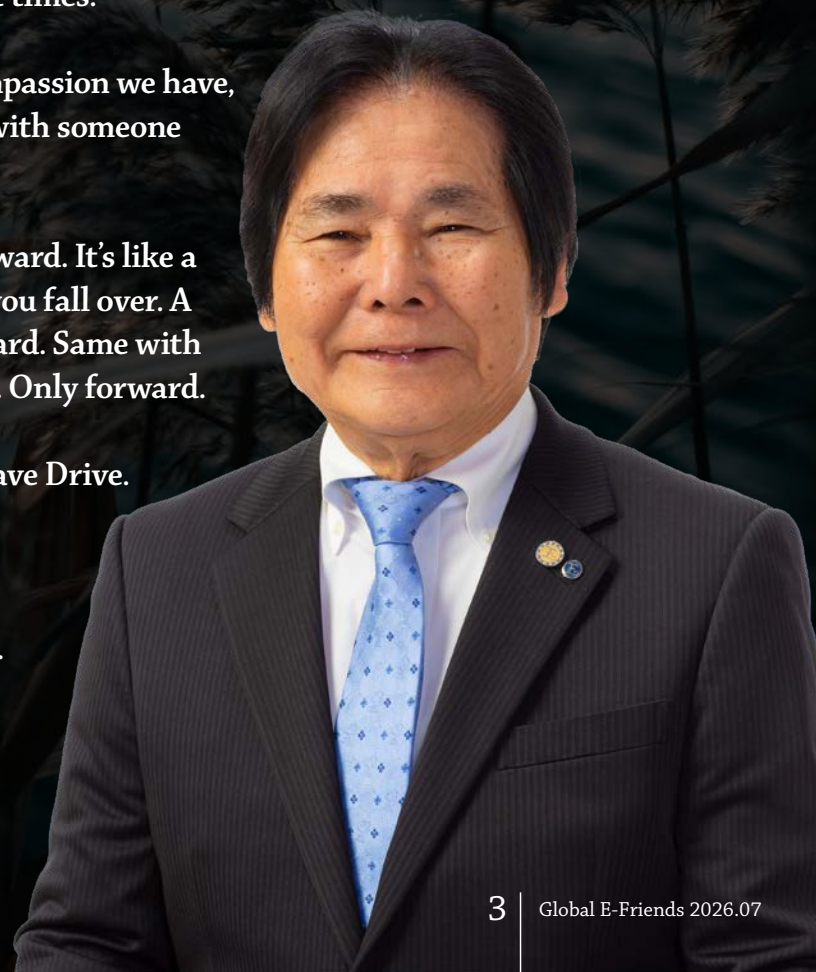

The friendship that me and Mr. Maehara have, the compassion we have, is very important for all of us. You have to do this job with someone you can trust because you have to work really hard.

Humans all want more. They want to keep moving forward. It's like a bicycle. You have to keep moving. Because if you stop, you fall over. A bicycle doesn't tilt over because you keep moving forward. Same with life. Once you stop, then it's over. There's no going back. Only forward.

If you guys work hard, there's no Reverse. You'll only have Drive. Enagic is now 52 years old. We're going to keep moving forward. Let's continue to spread Kangen Water®.

See you in 2027 for the next Enagic Global Convention.

Hironari Ohshiro
Enagic Founder and CEO

Relive Memorable Speeches From the 52nd Anniversary Enagic Global Convention

The 52nd Anniversary Enagic Global Convention took place on June 22 at Nago Civic Hall. The main hall holds 1,000 people and was packed for the biggest annual event on Enagic's calendar.

Enagic Founder and CEO Hironari Ohshiro and his family welcomed guests to the big event. Dancers dazzled attendees with traditional HanaKasa and Yotsutake dances. Top leaders and Enagic executives shared wisdom. The company recognized Independent Distributors who recently increased ranks to 6A and above. Enagic products like Kangen Beauté and emGuarde took turns in the spotlight. Principal Hayakawa (Chiba Institute of Science Affiliated High School) and President Fujimoto (Chiba Institute of Science) represented two Ohshiro Gakuen School Corporation learning institutions. Guests got to experience a special performance from opera singers Ritsuko Chinen (Soprano) and Hiroki Nakamoto (Baritone) who accompanied pianist Koji Takeda. An Eisa performance led to the night's final entertainment: Mr. Ohshiro on stage performing with his sanshin, a traditional three-string Ryukyuan musical instrument.

Nine speeches are available to watch on the Enagic YouTube channel under "2026 Enagic® Global Celebration - Okinawa." Here are excerpts from speeches that inspired conventiongoers.

Enagic Founder and CEO Hironari Ohshiro

There are still some countries I've never visited, but I've been to most of them. I always travel with my wife, Yaeko. Anywhere I go, the first thing I ask is, "Are you drinking Kangen Water®?" That is our mission and objective. I want people to drink Kangen Water®, take Ukon, and realize True Health. Thanks to you, you spread this philosophy to people around you in your country.

In order for everyone here and everyone that's going to be coming in the future to realize True Health, we've been working really hard for the past 10, 20, 30 years. There are still a lot of people out in the world that need us. We have 8 billion people worldwide.

You have to be able to tell everyone in your country about this product, about our company. This company is not just you drinking Kangen Water®. You have to give it to someone and ask, "Do you want to try this water?" Ask about physical health, financial health, and mental health, peace of mind.

Today is our first step toward the 53rd year. As you all know, our business is multi-level marketing, MLM. It's about you drinking, you taking the product, and then telling others how you feel about the product. We've been doing this for a long time in the U.S., Europe, Australia, Canada, the Philippines, Malaysia, Indonesia, Hong Kong, everywhere.

Thanks to all of you who spread True Health, spread Kangen Water®, all over the world. A lot more people are taking Ukon. We're coming up with new products every day. With the next step, we are trying to help the next generation study and become healthy. Thanks to all of your hard work, we were able to start a university as well, Chiba Institute of Science, starting April 1, 2026.

Enagic is all about 8 points, right? It's about prosperity, helping each other and moving forward. In order to do that you have to drink Kangen Water®. Let's work towards our 53rd year with more energy and continue to spread True Health throughout the world. We have to keep producing people that realize True Health, not just in your own country, but globally, just like me.

“Testimonials reflect individual experiences and are not typical. Independent Distributors are not guaranteed any level of income. Most participants earn modest supplemental income or less. See the current Earnings Disclosure Statement at www.enagic.com.”

6A5-5 Andhyka Sedyawan, Indonesia

13 years ago, if someone told me, “You are going to speak in front of thousands of amazing leaders in Okinawa,” I probably would have smiled and said, “I think you are talking about someone else.” 13 years ago I was no one. I was in uncertainty, but I believed in this business.

Mr. and Mrs. Ohshiro, thousands of people in Indonesia have never met you in person, but their lives have been touched by your vision. Many children get better educations. Many parents have found the opportunity meaningful and rewarding. Ordinary people have greater possibilities because decades ago you had the courage to not just build a company, but created an opportunity on behalf of Indonesia.

Over the years I struggled to build a business. I learned many things that I want to share.

#1: Dreams are free, but the journey is not. I ask people, “Do you have dreams?” Of course they do. But not every person out there has the courage to pay the price because dreams need discipline. Dreams require consistency. Dreams take some action.

#2: Follow your hearts. We often discuss product knowledge and the patented 8-point compensation plan, but people do not join because of the system. People join with us because

they feel seen. They feel valued. They feel inspired. Never forget that people may forget what you said. People may forget what you did. They will not forget how you made them feel.

#3: Never underestimate the power of one person. Every large organization always starts from one person, one conversation,

one vision, one decision. Then they're focusing on helping each other. They're focusing on growth. They're focusing on how we can succeed together. If we never underestimate this one person, ladies and gentlemen, this one person may change one family. A family can change a community, a community can change the nation, and a nation can change the world.

Responsibility for us as leaders is greater than ever. Our organization needs to be guided. Our organization needs to be led. They need examples. Not just making profit. Let us build organizations that are ethical, that also empower, that also inspire and can change the world.

6A2-3 Carly Shankman, United States

There was a moment where every single one of us could have said no. We could have said no to a class. We could have said no to the investment. We could have said no to the discomfort of believing that something bigger was possible for our lives. But you said yes.

I want to create an energy so powerful that one year from today, this company doesn't just grow; it quadruples. I want you to think of millions of more families with physical health, millions of more families with financial health, and millions of people with peace of mind because of this community that they get to be a part of. We are building a place where people feel at home.

We aren't just sharing water, we're sharing possibilities with people. Our products are

extraordinary, but products don't change the world. People do. Kangen Water® is a superstar, but without people willing to serve, to share, to speak, the products never leave the warehouse. What do you think determines whether the product sits on the shelf or goes out to change a family's life? Belief is the bridge between possibility and reality. Every rank within this company comes down to one thing: your willingness to believe is bigger than your current circumstances.

You can create legacy and impact. You can be the leader that your family has been looking for. It's you. What if this was exactly what you were put on earth to do, to lead, to inspire, to impact?

Different stories, different cultures, different languages, but one shared mission.

Enagic Global Vice President Hiroki Ohshiro

My father, 85 years ago, was born in a small village called Sedake in Nago City. I've heard his stories. I've also heard stories that he was saved 81 years ago by the U.S. military during the war. I want to drink Kangen Water®, share this, and take the war away from the world.

My father is a businessman. He's an entrepreneur. When he first started the business, it was Sony, and he was working very, very hard. I still remember my childhood days. I know they were struggling because I was living in the household back then.

When Mr. Ohshiro first started, it was only Japan. This was about 30 years ago. Thanks to all of their hard work, we were able to acquire the Osaka factory, as we know today. Everything started in Japan. The power from Japan led to what we have today.

Some top leaders have been with us for close to 30 years now. Thank you very much.

6A3-3 Jilly Torrez, United States

I didn't come from money. I came from lower class, made my way to middle class, back down to lower class. As soon as I made money, I lost money. I didn't know anything about Mr. Ohshiro. In 2017, I came to Okinawa and found out that he didn't come from money and he's indigenous to Okinawa. I come from an indigenous lineage in California. The Chumash people. I realized that's me. So I went on the journey to become -3. I made lots of mistakes and I dealt with a lot of money issues, but I made it to -3.

I started studying E8PA, Mr. Ohshiro's Prosperity Association that's helping to rebuild Sedake, his indigenous village. For those of you who know about getting land back and rebuilding economies, he's doing that. I found Mr. Ohshiro's teaching about the circle of compassion, which for him in his culture that he inherited from his mother. Compassion is a way of life for him. It runs through his veins. He doesn't know anything else. Many of us indigenous peoples all over the world, re-indigenizing ourselves, we don't do things alone. We do it with our people.

In America, we have to be successful by ourselves. Everything is on our own. Especially for the moms out there. There's so much pressure to do everything on your own. But that's not our natural state. We do it together. We bring people with us. When I started studying the circle of compassion in all of the old E-Friends newsletters, we had to go deep. We started making a documentary, "The Compassion Project." It's on YouTube.

Every single leader needs to have E8PA. If you trust where this company is going, he is going to continually take care of you. When you invest in the E8PA, you're investing into compassion. According to our research and speaking to Okinawans, compassion is not a feeling, it's an action. You can sit back, or you can decide to be a part of the movement.

6A3-4 Sanjay Sondagar, India

When Kangen Water® came into my life, relatives and friends said. "He's crazy, he's spending \$4,000 just for water?!" People said it's too expensive. People rejected me. People made fun of me, I sucked it up. I kept moving forward. Instead of giving up, I risked the global stage.

A small voice beside me kept saying not to give up. Then I started using Kangen Enagic to share with people. I started sharing with one family, 10 families, 20 families, 50 families and 150 families. Still I was at zero, but life is not set and sent me a teacher. I want to take a moment to thank 6A6-6 Updesh Malik from the bottom of my heart, who looked at the two-year rank distributor who had nothing to show and said, "Come to Malaysia. Come to a bigger world."

That was 2018. I was just a 2A. I met 6A8-6 Amos Sia's family. I looked around at people from every country, from different backgrounds, and united by one mission. We stopped and said these words out loud. I want to share with you the words that saved my life: one more time.

After my first job failed. I said, "One more time." After my second job failed, I said, "One more time." After my fifth and ninth job, I always said, "One more time." I am standing here today living proof it is never over. Today I stand before leaders on the global stage. Not because I was smartest, not because I was luckiest, but because I refused to let my last failure be my final chapter.

I will keep serving. I will keep building. I will keep spreading True Health to every corner of the world. No matter how many times I fail, I make one more attempt. Winners are not those who never fail. Winners are those who always say one more time.

6A3-3 Sushma Limbu, United States

I'm originally from Nepal, a beautiful country known for the highest mountain in the world, Mount Everest. I'm a single mom. I came to New York City almost 12 years ago from Singapore, bringing my son to give him a better life, good education, and fulfill his American dream. Like many other immigrants, we started from scratch. I started working a housekeeping job part-time and I started working full-time in a nail store... I used to work 13-14 hour hours a day seven days a week. At times it was impossible to get a day off even when we were sick.

That was the harsh reality that most immigrants face. I never had time for my son. On top of that I was always struggling to make ends meet. We used to live in a semi-base apartment in New York, which is more like an underground apartment. Every night I used to pray to God, "One day please let me wake up seeing the sunrise from my window."

Since we are in a land of opportunity, I pushed myself, worked hard. I used to study until 2 or 3 in the morning just to get my real estate license so that I can upgrade my life and support my son and give him a better life... I managed to get out from that same basement apartment to the third floor at least seeing the sun outside our window, and I'm so proud of that.

Although I was making good money in real estate, I was not really happy... So I was looking for a side hustle where I could work from home, be my own boss, and spend more time with my son. That's when I found out about this platform through my closest sister, who's still a full-time registered nurse in New York. That's how I ended up joining this business. Was it easy to hit 6A3-3 in a matter of four-and-a-half years in the business? Hell no, but I'm glad I did it.

Without you guys I won't be here today standing tall and bold. Let's rise and shine together.

Road to 6A

Independent Distributors Share Notable Enagic Global Convention Experiences

Top leaders flew to Okinawa from across the world to attend the 52nd Anniversary Enagic Global Convention at Nago Civic Hall on June 22. They shared some memorable experiences.

6A2 Loong Zhi Yee, Malaysia

I've served Enagic for twelve years, and this is my first trip to Okinawa. Grateful to my mum, who joined this Enagic family first to build markets. This second generation now stands on her shoulders to see a wider world. Quiet and understated Okinawa holds life-changing global power; never judge by appearances. May this beautiful island stay peaceful, blessed, prosperous and free of hardship.

6A3-3 Arturo Melillo, Italy

Attending Enagic's 52nd Convention in Okinawa was much more than an event; it was an experience filled with growth, inspiration, and deep gratitude.

I would like to sincerely thank Enagic and our extraordinary President, Mr. Ohshiro, for the vision, values, and mission that inspire us every day. Thank you for building a company that places people, True Health, freedom, and the opportunity to create a better future at its core.

My deepest thanks also go to everyone who shared this journey with me. Every smile, every conversation, and every emotion we experienced together made this experience even more special.

I am returning to Italy with even greater enthusiasm, knowing that the best is yet to come. We will continue to work with humility, passion, and determination to carry forward this wonderful mission, helping more and more people build a better life.

6A3-3 Winnie Chan, Malaysia

Attending the Enagic 52nd Anniversary Global Convention awards ceremony was truly a meaningful and inspiring experience. I felt the weight of five decades of dedication, innovation, and trust built across the world. This milestone is not just a celebration of growth, but a testament to a vision rooted in True Health, harmony, and service to humanity. Most importantly, I sensed the abundant blessings from our Heavenly Father guiding every step of this journey. His grace has sustained Enagic through challenges, connected hearts across nations, and allowed this noble mission to flourish. This ceremony deepened my gratitude and renewed my commitment to share its values with others.

6A Priscilla Chua, Singapore

This is my first time attending an Enagic Global Convention.

I am truly inspired by the many success stories shared and the incredible energy in the room. The excitement from the rank achievers is contagious.

I've been intentionally observing how the achievers speak on stage, how they carry themselves, and how they present themselves with confidence. For me, this is part of my preparation for the future. Their journeys have deeply moved and motivated me.

The most exciting part of the convention was seeing my friends on stage. They were glowing and I am genuinely happy for them. Their success inspires me to work harder and keep moving towards my own goals.

I am grateful to be part of such a grand celebration and recognition. So nice to be surrounded by people who dream big. Looking forward to one day walking across that stage too.

6A Swan Ho, Malaysia

I am just an ordinary woman from a small town in Malaysia and ever since I became a Singapore Enagic distributor, this journey has been nothing short of life-changing.

Three years ago, I started my Enagic business while juggling a full-time job as the Asia Regional Design Manager in a famous MNC and caring for two babies under age two.

This business is my first and only business in my life! Before this, I never thought about doing any business, but I changed my mind when I chanced upon Enagic!

There were countless late nights, early mornings, challenges, doubts, and moments when giving up would have been easier. But I chose to trust the system, trust the process, trust my journey, and learn from every mistake along the way.

This June, I had the opportunity and privilege of being recognized on a global stage, celebrating my 6A accomplishments alongside top leaders from around the world. We traveled to Okinawa in Japan to celebrate our rank advancements and milestones. Every recognition represents the hard work, persistence, determination, and dreams behind the journey.

I am deeply grateful to everyone who has been part of this journey... my family, teammates, business partners, and founders. Thank you for everything!

May this celebration be a memorable one, and may it inspire all of us to continue dreaming bigger, flying higher, and creating greater impact in the years ahead. Dreams do come true!

6A2 Sandra Emeodi, United States

One of my most memorable moments at the 52nd Global Convention was connecting with the incredible diversity of people who came from every country where Enagic has a presence. It was a powerful reminder that this business is truly global, built on connection, opportunity, and shared purpose.

What I love most about this business is the flexibility to manage my time. The strength of a patented 8-point compensation plan rewards growth and consistency. Even more inspiring is the joy of meeting people who have stayed committed to this journey for years and continue to thrive in it.

I am deeply grateful to be part of something that is not only changing lives, but also building a global community of success.

“Testimonials reflect individual experiences and are not typical. Independent Distributors are not guaranteed any level of income. Most participants earn modest supplemental income or less. See the current Earnings Disclosure Statement at www.enagic.com.”

India Distributor Profile

Arjun Sethi 6A2

6A2 Arjun Sethi was born and raised in New Delhi and continues to live in India's capital city, which houses over 30 million people and provides countless opportunities, not just for business.

Arjun's cousin, Rajat and their friend 6A2-2 Rohit Sharma introduced him to Enagic. "Enagic's product and patented 8-point business plan were very attractive," Arjun says. "After understanding the market potential, I decided to initiate my journey."

Arjun spent the seven years beforehand working as an educational consultant for a U.S. based company. "My previous experience helped me develop confidence to talk with anyone on any particular topic or subject," Arjun explains. "I also developed a coachable attitude." Confidence, communication and flexibility of course go a long way for Independent Distributors, and in life.
